

SCHEMATIC DESIGN PROPOSALS FOR STREETSCAPE ELEMENTS

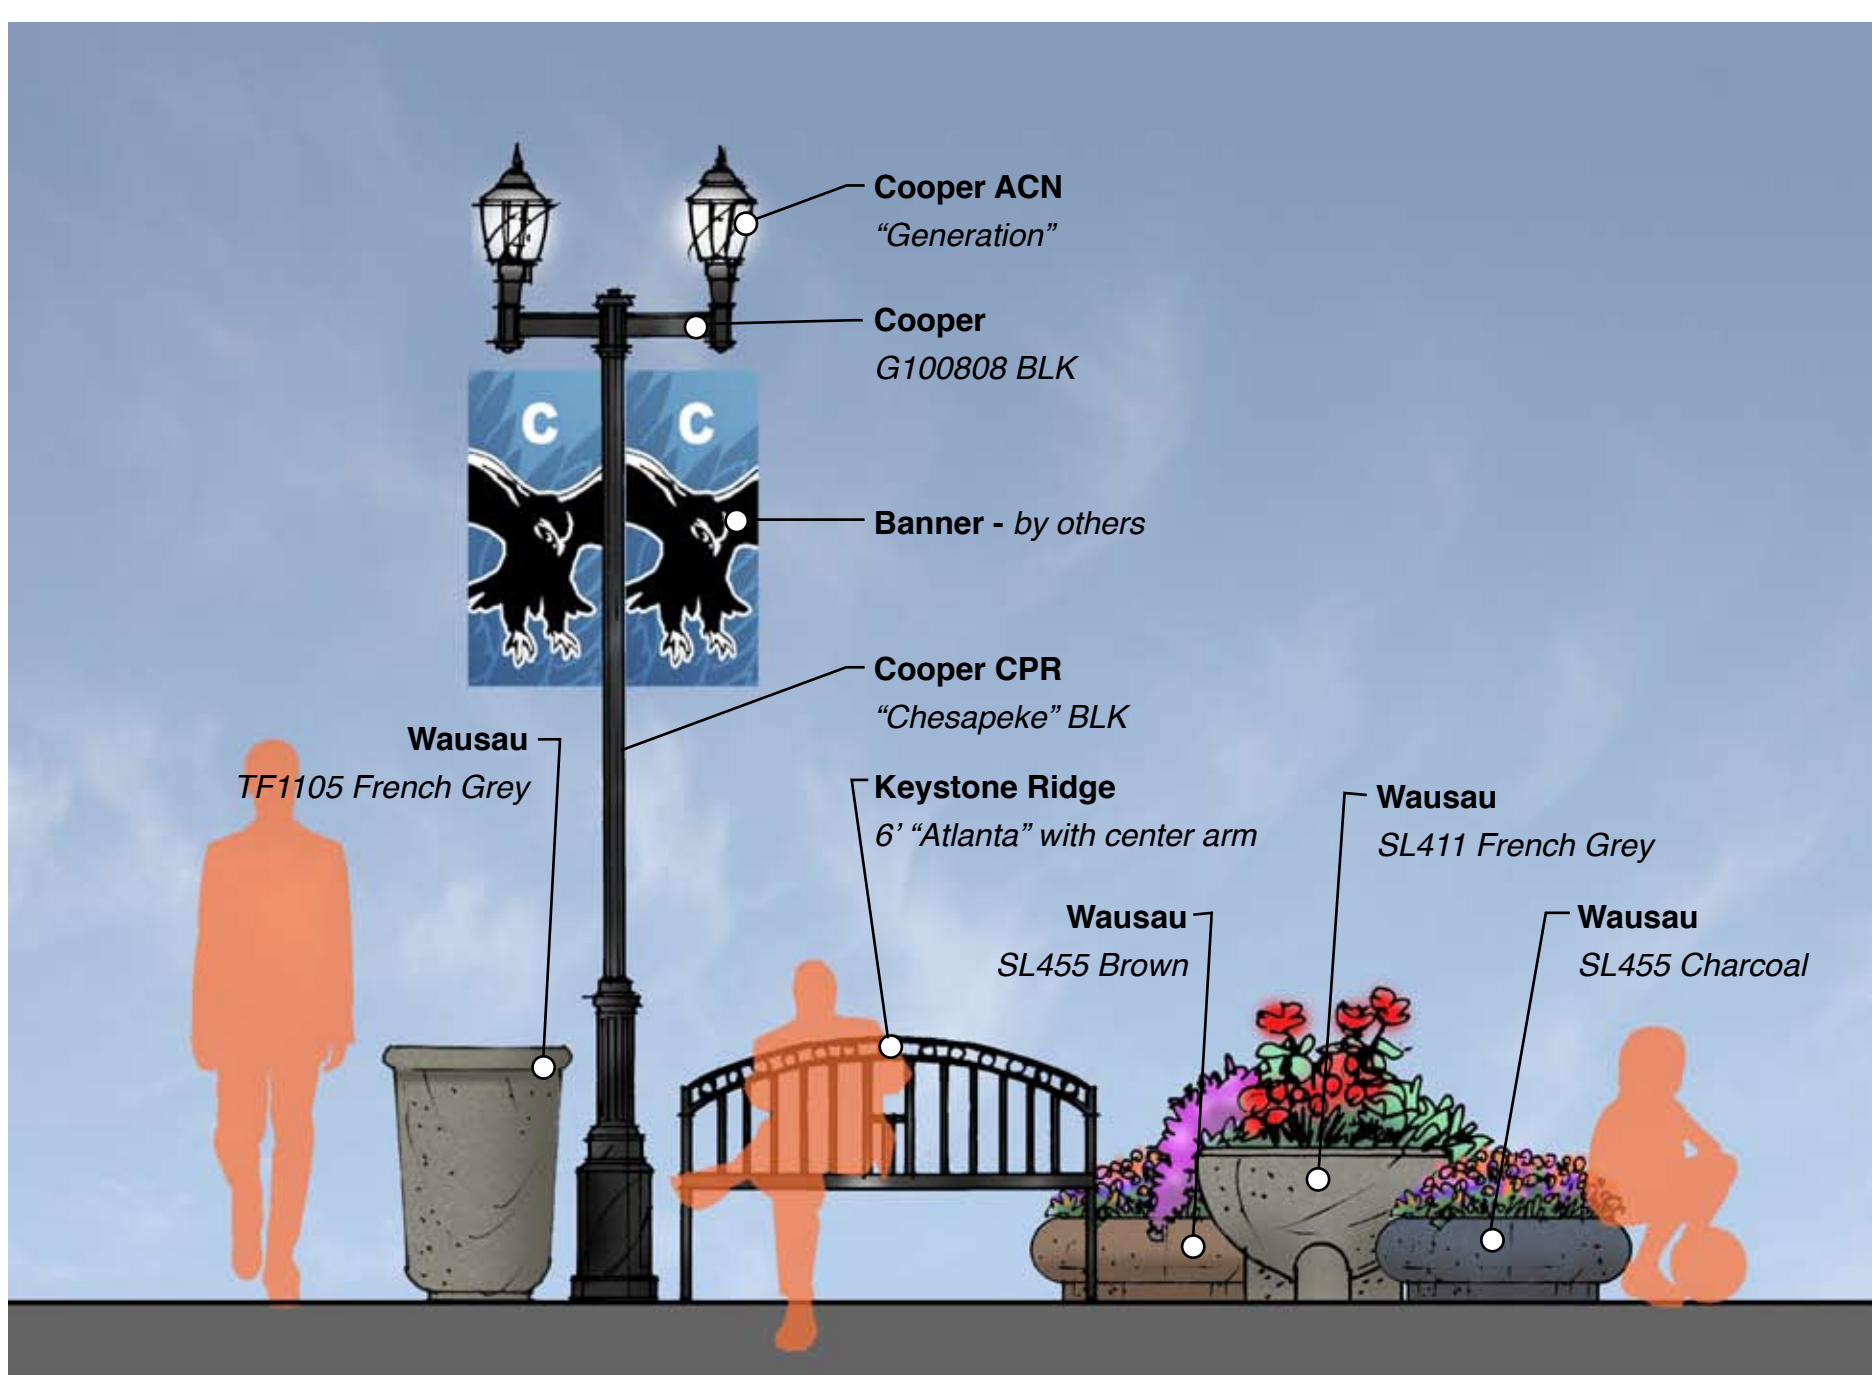

The variety of elements for enhancing the city's streetscape are endless. We have combed through several product catalogs to select four possible schemes which seem consonant with the existing character of Connellsville. A few streetscape elements have been culled from the Pittsburgh Streetscape Components Catalog. The intention behind each scheme is to create a palette of options that increases pedestrian comfort while adding a level of visual coherency to downtown Connellsville.
